--

Here is my rare bird report from Big Johnson.

Who: Glossy Ibis *Plegadis falcinellus*

Where: Big Johnson Reservoir, El Paso County

When: There was card carrying adult breeding type Glossy Ibis at Big Johnson Reservoir (El Paso) on 4May02. You know the type, dark brown eye, light bluish eye thingies (not so blue in the photo though) joining behind the eye in only a very narrow line, and bill a little more brown than gray. It is in with a small flock of White-faced Ibis numbering about 12.

Why: Look at the color (pale blue) and shape (does just thinly join behind the dark BROWNEYE) of the facial skin. Photo hints at bill being slightly browner than gray. c.a. White-faced Ibis behind with different shape and color of facial skin especially bare skin that encircles the REDDISH EYE. Bill of WFIB is noticeably more gray. Feet. I was only a short number of feet away but theirs they kept in the shallow water along with their tibiotarsus.

Used: Canon G-2 Powershot digital camera through Leica APO scope with 20x-60x zoom lens at 20x setting for one and at ~30x for the other.

William (Billy-Bob) Maynard
