rec'd 6/14/02

Brandon,

Enclosed are slides of a couple of possibly interesting bird records from our recent VENT Colorado Grouse tour. I ran into Tony Leukering on the trip and he mentioned wanting a slide of the Gunnison Little Blue Heron. I don't seem to have his address so could you please forward one of these to him. E-mail me at brzimmer@aol.com if you have any questions.

thanks,
Barry Zimmer

Little Blue Heron - one adult bird found by Kevin Zimmer about 10 miles east of Gunnison in Gunnison Co. on April 20. We alerted another group of birders to its presence and they went to look for it later on that day. I took the enclosed photos.

Broad-winged hawk - This may not be of that much interest but they seemed out of place to me. We had at least three and possibly four Broad-winged Hawks in Poudre Park (Larimer Co.) April 25 sitting around in the larger trees around town early in the morning. See enclosed slide.

The slides are yours to keep.

2002-64

Barry Zimmer
