CFO-RC FILE #: 2001-137 RESULTS: OBSERVER: Coen Dexter
COLORADO FIELD ORNITHOLOGISTS SIGHT RECORD FORM
Species: Blackpoll Warbler Dendroica Striata
Species: <u>Blackpoll Warbler</u> <u>Dendroica Striata</u> (Common Name) (Scientific Name)
Date(s) of observation: 9 Jun 2001 Number of birds seen: 1
Sex: M Plumage: Breeding
Exact location: Deer Lodge Park DiNOSaur National Monument
County: Moffat Near by town: Maybell Elevation: 5800
Length of observation: 1 how Times(s) of observation: 8:15 - 9:15 AM
Other observers who saw the bird(s) with you: Brenda Wright, Glenn Giroir, Lisa Clauss
Other observers who independently saw the bird(s):
Light conditions (quality; direction relative to bird's position): good - all directions
Optical equipment used: 10 bx 42 swarovski and 3 other pair of binocs
Distance from bird(s): <u>20 - 40 feet</u>
Was bird photographed? <u>No</u> Were photos submitted?
Who took the photographs?
Describe the general and specific habitat in which the bird(s) occurred: $\underline{R_{iparian}}$
lowland - The bird was singing in Cottonwood trees
along the Yampa River
Describe the bird's behavior (flying; feeding; habits; behaviors used in identifying the
species or in supporting the identification): The bird was 5inging 20-40
beet in cotton woods. Every few minutes the Blackpoll Warkley would
be harassed by Yellow Warblers and forter ind a new singing perch.
Describe the bird(s) in detail. This is the most important part of this report. Include
overall size and shape, and how you placed the bird(s) in the general group that you did.
Give complete details of plumage, including head, throat, undersides, nape, back, wings, and tail. Give particular emphasis to marks you used to identify the bird. Describe other
details, such as color and shape of bill, legs, eye, (etc.) that were important in making the
identification. The warbler was 5 mall-about the size of the xellow warblers who wer
Present. The workles had a black cap and white checks. The upper parts were heavily streaked
with black on a gray := background. The wings were dark with two white wing bard. The tail
had white tail spots. The underparto were White with black streaks on sides abreak
and chest and belly. Nape was streaked. Lags and fast were straw colored.
Describe bird's call: (all use extremely have to could have the head it imples
Describe bird's call: <u>Call was extremely high</u> . <u>I</u> could hardly hear it unles I was very clase to the bird. Brenda found the bird first by hearing it sing. Discuss similar species and how you eliminated them: <u>Black and white warbles</u> - Song d. fleraut
Discuss similar species and how you eliminated them: Black me Dubite Woulder - Song & Ilyung
white strip through (rown, and white eyebrow. Black-throated Gray Warbly- Song dibband, white What is your prior experience with this and similarly appearing species? I have eyebrown yellow had a lot of experience with all three of these common trachlen, of eye, black List books, guides, recordings, or other sources consulted and how these influenced your throat, black
had a lot of experience with all three of these common warbles. Spot in front
List books, guides, recordings, or other sources consulted and how these influenced your throat, black
identification: we was found as to Constitute out TD

identification: we used several guides to confirm our ID but they did not influence our ID
