VIRGIL SCOTTSTEW ADAMSVINCE REIDOptical Equipment: BINOCULARS

If photographed, type of equipment used: _____

Light Conditions: GOODDistance from bird (how measured): WITHIN CAMERA RANGE OF 600MM LENS - BUT NOT WITHSHORT EXTENSION TUBENumber of Birds Seen: ONE Sex: _____ Plumage: _____

Describe the bird's overall behavior and demeanor:

WITH TWO MOORING DOVES

Describe in great detail the bird's size, overall shape, plumage and color-pattern. Include details on shape of bill, wings and tail. Give particular emphasis to the marks you used to identify the bird. Reference to its resemblance in field guide descriptions is not enough. Describe what you actually saw in the field:

WHITE PATTERN IN WINGS CONTRASTED SHARPLY WITH THAT OF DOVES AND WAS CONSISTENT WITH THAT IN FIELD GUIDE (ROBBINI ET AL P.154),

Describe the bird's song or call, if heard, including method of delivery, i.e., from perch, in flight, etc:

N.A.

Describe the habitat in which you observed this bird:

SHORT-GRASS PRAIRIE AND WHEAT FIELDS

How were similarly appearing species eliminated?

ABSENCE OF WHITE PATCHES IN WINGS.

Prior experience with this and similarly appearing species:

TEXAS AND BIRDS HELD IN CAPTIVITY

Books, illustrations and advice consulted and how did these influence this documentation?

This report was written from notes made during ___ after ___ observation; from memory X

STU ADAMS

Optical Equipment: 7X35 BINOCULARS

If photographed, type of equipment used: -

Light Conditions: CLEAR

Distance from bird (how measured): 50 yds - estimated

Number of Birds Seen: 1 Sex: Plumage: Adult

Describe the bird's overall behavior and demeanor:

Bird was flying with 2 ~~mourning~~ doves and perched on fence for about 50 yds for a few minutes then flew off together.

Describe in great detail the bird's size, overall shape, plumage and color-pattern. Include details on shape of bill, wings and tail. Give particular emphasis to the marks you used to identify the bird. Reference to its resemblance in field guide descriptions is not enough. Describe what you actually saw in the field:

Bird appeared slightly larger and less streamlined than the two mourning doves it was with. White wing patches could be observed while flying and while perched on fence.

Describe the bird's song or call, if heard, including method of delivery, i.e., from perch, in flight, etc:

No call

Describe the habitat in which you observed this bird:

Dry land wheat farm and short grass prairie

How were similarly appearing species eliminated?

By lack of white wing patch -

Prior experience with this and similarly appearing species:

White-wing doves were common in Arizona where I lived for 10 years.

Books, illustrations and advice consulted and how did these influence this documentation?

If photographed, type of equipment used:

Light Conditions: Clear calm

Distance from bird (how measured): 50 yards (estimated)

Number of Birds Seen: 1 Sex: Plumage: Adult

Describe the bird's overall behavior and demeanor:

White-winged dove was flying with 1/2 mourning doves, perched on fence for few minutes, then flew off.

Describe in great detail the bird's size, overall shape, plumage and color-pattern. Include details on shape of bill, wings and tail. Give particular emphasis to the marks you used to identify the bird. Reference to its resemblance in field guide descriptions is not enough. Describe what you actually saw in the field:

Similar to mourning dove. White wing patches could be seen in flight and when bird was perched on fence

Describe the bird's song or call, if heard, including method of delivery, i.e., from perch, in flight, etc:

No call heard

Describe the habitat in which you observed this bird:

Short grass prairie and dry land whost

How were similarly appearing species eliminated?

lack of white wing patches

Prior experience with this and similarly appearing species:

Stucky skins

Books, illustrations and advice consulted and how did these influence this documentation?

Optical Equipment: 7x35 BinocularsIf photographed, type of equipment used: N.A.Light Conditions: 20% cloud coverDistance from bird (how measured): less than 30' when first sighted on R.O.W. fenceNumber of Birds Seen: 1 Sex: ? Plumage:

Describe the bird's overall behavior and demeanor:

Associated with a small flock (5-6) of Mourning doves

Describe in great detail the bird's size, overall shape, plumage and color-pattern. Include details on shape of bill, wings and tail. Give particular emphasis to the marks you used to identify the bird. Reference to its resemblance in field guide descriptions is not enough. Describe what you actually saw in the field:

The wing marking was the first thing to catch my eye followed by the square tail in contrast to a mourning dove.

Scott & Pillmore have worked in Arizona and are well acquainted with the species.

Mr. Reed FWS was with us but I don't recall if he was seated where he saw the bird.

Describe the bird's song or call, if heard, including method of delivery, i.e., from perch, in flight, etc:

N.A. birds flushed from fence and flew across the road and out of sight

Describe the habitat in which you observed this bird:

Fence row adjacent to winter wheat field.
Short grass plains across the road

How were similarly appearing species eliminated?

Mourning dove size and seen with this species.
Wing markings and rather square tail were obvious

Prior experience with this and similarly appearing species:

None for me. Scott & Pillmore have worked in Arizona and are well acquainted with the species.

Books, illustrations and advice consulted and how did these influence this documentation?

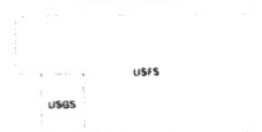

Petersens guide to western birds and Robins guide.
Looked at illustrations to confirm 1st I.D.
