Grandview Cemetery

(cont 68) (87) yellow-bellied Sapsucker (1st winter, ♂ (red throat → ♂))
150 yards e. of SW corner of cemetery, just on the golf course.
Clump of 8 Austrian pine, 2 spruce & 2 lg. cottonwoods just
north of water/pest hut & lg. sign with red 8 & blue 17 on it.
Headstone just north of clump is "HEATH" (w) & "BURKE" (e)
Studied bird @ length as it made the rounds to feed
at sap wells made in 3 of the lg. Austrian pines (12-16" dbh).
Heard it "new" 5 or 6 times. Usually called only once,
sometimes twice then would go several minutes before
calling again. Most of wells worked well @ 15' of
ground.

812 Powderhorn Drive

- (cont 69) (88) Cassin's Finch (~10)
Dark-eyed Junco (1)
Evening Grosbeak (few)
